

ATMU – Project Goals

Collaborate with Community Rehabilitation Facilities throughout Indiana

Offer direct-to-consumer demonstrations of spinal cord related technologies

How things work:

Identify a hospital liaison to discuss and coordinate potential referrals.

While receiving therapy services patients are given a referral card

INDATA staff collect referral cards monthly and then schedule individual demos with the clients.

Device Demo & Lending Library *bringing assistive technology to you*

Easterseals Crossroads offers a mobile assistive technology unit to provide free device demos and equipment loans to Hoosiers statewide. We can help you make decisions on equipment and provide technology as you wait on funding.

We are your short-term accommodation to improve your quality of life through technology.

We can come to you with . . .

- 20-30 minute device demos
- Lending library filled with 2,500+ items for 30-day loans (includes environmental controls, computer access equipment, seating & positioning, adaptive workstations, equipment to assist with activities of daily living and more)
- Knowledgeable staff with the expertise to understand your needs and provide quality solutions

Easterseals Crossroads | INDATA Project
4740 Kingsway Drive | Indianapolis, IN | 46205
888.456.1314 | eastersealscrossroads.org

Our device and lending library is made possible through a generous grant from the Christopher and Dana Reeve Foundation. This fund is designed to bring assistive technology to those who need it through our Assistive Technology Mobile Unit.

In order for us to understand more fully your needs, please complete these questions.

Name _____
Phone _____
Address _____

Email _____

I would like a demonstration of this equipment:

- Home Control or Modification Equipment**
- ___ Intelligent Personal Assistants (Amazon Echo, Google Home, etc.)
 - ___ Voice or switch control options (home use)
 - ___ IoT options (internet connected doorbell, thermostat, etc.)
